Restriction to one of the following invention is required under 35 U.S.C. 121.

Group I: Claims 6-12 and 16-22 drawn to composition and method for treating hepatocellular carcinoma in a patient employing docetaxel.

Group II: Claims 13-15 drawn to treating hepatocellular carcinoma employing an enhanced combination of the Group I invention and another therapy. If applicants elect this Group, they are further required to elect a single enhanced combination of docetaxel and one specific other therapeutic agent for examination on the merits. It is noted that page 5, line 12 of the specification clearly states that "synergism between these compounds and docetaxel".

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating hepatocellular carcinoma as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one enhanced combination of drugs would not be a reference to another enhanced combination of drugs under 35 U.S.C. 103. Further, the claims read on a multitude of enhanced combinations of drugs, which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicants are required to make a provisional election even though this requirement is traversed.
